

CMP301 Computer Networking

Component Two: Group Project (60%)

Criteria (100%)	80-100% High 1st	70-79% 1st	60-69% 2.1	50-59% 2.2	40-49% 3rd	0-39% fail
Research material (to include extent of background research, quality of analysis and citations & references) 25%	Subject knowledge is evident throughout the presentation; information is clear and correct. The presentation contains pertinent points related to the assignment topic; and is free of errors and weaknesses. Such points are excellently addressed in an appropriate depth level and thoroughly analysed. When needed, specific support is provided for each statement from credible sources.	Subject knowledge is evident in much of the presentation; with very few exceptions, almost all presented information is clear; most references are suitable, and the statements made are supported with appropriate citations. The researched material to a considerable extent is addressed and analysed thoroughly. When particular points are addressed, it is done in a particularly proficient level of conciseness.	Subject knowledge is evident in the presentation; however, there are few exceptions where details may be missing or where particular points are not addressed in a good depth and conciseness. The researched material is mainly meeting the requirements and guidelines of the assignments with very few exceptions, it is generally clear and easy to identify the sources of statements made and references are suitable.	The researched material in the presentation partially meets the requirements and general guidelines of the assignment; details can be missing, and when particular points are addressed, it is not always done in an appropriate level of conciseness. There are instances where material sources may not be suitable, or the claims are not supported by citations.	The researched material may be remotely related to the topic of the assignment; details are somewhat sketchy and do not support the topic of the assignment and may lack conciseness. Source materials may not be relevant to the purpose of the presentation. Often, it can be unclear where information or facts come from a source.	The researched material and information are confusing, incorrect, or flawed; the presentation material can be partially or totally unrelated to the topic of the assignment; addressed points are not well defined, not well argued and sketchily covered. The presented material does not meet the requirement of the assignment; material is not supported by citations, or the references used are not suitable / credible.

Trace files, traffic or design files analysis (as appropriate) 25%	The analysis addressed most of the issues related to the problem area. The analysis integrated sufficient components to the bulk of its goals.	The analysis addressed a large part of the issues related to the problem area. The analysis integrated many components to the bulk of its goals.	The analysis addresses a good number of the issues related to the problem area. The analysis integrated a good number of components to achieve a good range of goals.	The analysis partly addresses some of the issues related to the problem area. The analysis integrated sufficient components to achieve a moderate range of goals.	An inadequate analysis was presented which did not clearly address the problem at hand. The analysis minimally integrated elements to achieve its goals.	The analysis is flawed or incorrect. It is very sketchy and does not address the problem at hand.
PPT presentation (to include quality of both PPT and text; ad coherence of the points made) 10%	Points made catch the viewer/listener's attention and hook him/her to the presentation: they are well organized and motivating. Such statements and points are introduced in a logical order and are well inter-linked. The presentation is error free and does not encompass any grammar or spelling errors.	The points made in the presentation are clear and coherent and evoke good interest from the viewer/listener. The text has very few mistakes or spelling errors, details are presented in a logical order.	The points made in the presentation are generally clear but may be uncoherent occasionally and the link between such points may not be obvious. The text has few mistakes or spelling errors, details are presented in a logical order, although with some incoherence.	The points made in the presentation evoke a limited interest from the viewer/listener: they are brief, incomplete, and incoherent. The structure of the presentation from its introduction to its conclusion did not orient the student to the topic being covered; there are many spelling and other mistakes in the text.	The points made in the presentation do not evoke interest from the listener / viewer as there is a limited coherence between the points made. The presentation is badly structured; text includes many errors.	The points made in the presentation are unclear; the listener or viewer may lose interest and is hard for him / her to comprehend the topic; the presentation is incoherent and is ill structured.
Video recording (to include	The recording runs smoothly; changes of	The recording runs mostly smoothly; only	Multiple types of transitions may be	Multiple types of transitions may be	Multiple types of transitions may be	Video is of poor quality and is unedited. There

quality of recording, creativity, communication, organization and clarity, use of adequate visualization techniques (e.g., snapshots) 10%	speakers and introduction of new ideas transitions are smooth and almost unnoticeable. The video recording, vodcast or podcast is well structured. The selections of graphics, sound effects and works of art have assisted in the communication of ideas. The recording timing is perfect.	very few changes of speakers or introductions of new ideas transitions are noticeable. Still the viewer is hooked and the recording, vodcast or podcast is well structured. The selections of graphics, sound effects and works of art have assisted in the communication of ideas. The recording timing is almost perfect.	used; however, there is little impact on the smoothness of the recording. Such transitions are used for a purpose: to help tell the story of the presentation. The pacing and timing of the video are good; and the graphics are well employed to convey information.	used; however, there is some impact on the smoothness of the recording. There are few transitions which do not help the purpose of the recording, or the recording is ill structured. The timing and pacing need to be reviewed as the recording is either too long or too short. When used, graphics and sound effects are not always well employed.	used: there is a clear impact on the smoothness of the recording. There may be multiple transitions which do not help the purpose of the recording, or the recording is ill structured. The recording is either too short or too long; the pacing is ill suited for the recording length. There may be no graphics, sound effects or work of art to support the recording story.	are no transitions added or transitions are used so frequently that they detract from the video. There are no graphics. The timing and pacing are not suitable.
Individual contribution to the group work (to include organisational & time management skills, and	There is evidence of strong and logical organization and the coherence shown clearly enhances the work. The individual contribution is pertinent to the assignment and	The student's part demonstrates very good and sound organization; and good coherence which can be imaginative and engaging. The individual contribution is appropriate to the goal	There is a good organization which shows that the student's contribution addresses pertinent points and adds to the group's effort. There is good focused on the aims and themes of	The individual contribution may be partially disorganized and incoherent. There is a limited contribution to the aims of the assignment and group's effort. The student has just an	There is a limited organization and the student's contribution is poorly presented Some of the work is focused on the aims and themes of the assignment.	The individual contribution is disorganized and can be incoherent. The student's contribution fails to address any pertinent points of the assignment, lacks focus, and the

technical task fulfilment) 30%	addresses it comprehensively. The points made are appropriate, addressed fully and with some creativity.	and context and addresses the main purpose of the assignment. The points made are consistent and add to the focus of the group's presentation.	the assignment. Mostly, the student's part contributes to the collective effort of the assignment.	adequate address to a limited number of pertinent points of the assignment; there is evidence to show that few of the addressed points may lack focus.	Mostly, the student's contribution fails to contribute to the collective effort of the assignment.	technical contribution may be very modest.
